The U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) developed and pilot tested the Strategic Leader Development Inventory (SLDI) to satisfy that need. As a part of the concept, an automated feedback printing program was developed to enable user organizations to print graphic feedback that facilitates student interpretation of SLDI scale scores. That program was developed for the academic year 91-92 pilot test and was revised for the academic year 92-93 field test of the SLDI. ASM, SLDI, PCL, Computer, Assembler, Leadership.

Exams will likely go live the following August and September. This launch is a comprehensive revamping of the MCSE (Microsoft Certified System Engineer) track with all new core exams and all new electives. In addition, the MCSA (Microsoft Certified System Administrator) certification will expand its program to include an additional upgrade exam for MCSAs wanting to become MCSEs. The launch of this new certification track means that all current MCSEs, representing an installed base of approximately 200,000 (source: MCP Magazine) will need to recertify under Windows Server 2003. In addition, any MCP looking to become an MCSE-- estimates are about 1.2 million (source: MCP Magazine)--will also have to continue their certifications under the new program. Many industry experts expect the Windows 2003 certification, and product line as well, to be a more popular track since many organizations are still using NT and plan to skip 2000 and go directly to 2003. * DVD Provides a "Virtual Classroom": Get the benefits of instructor led training at a fraction of the cost and hassle. * Guaranteed Coverage of All Exam Objectives: If the topic is listed in Microsoft's Exam 70-292 objectives, it is covered here. * Fully Integrated Learning: This system includes a study guide, DVD training and Web-based practice exams.
