[Classic Chemistry Demonstrations](#) Oct 17 2021 *Classic Chemistry Demonstrations* is an essential, much-used resource book for all chemistry teachers. It is a collection of chemistry experiments, many well-known others less so, for demonstration in front of a class of students from school to undergraduate age. Chemical demonstrations fulfil a number of important functions in the teaching process where practical class work is

not possible. Demonstrations are often spectacular and therefore stimulating and motivating, they allow the students to see an experiment which they otherwise would not be able to share, and they allow the students to see a skilled practitioner at work. Classic Chemistry Demonstrations has been written by a teacher with several years' experience. It includes many well-known experiments, because these will be useful to new chemistry teachers or to scientists from other disciplines who are teaching some chemistry. They have all been trialled in schools and colleges, and the vast majority of the experiments can be carried out at normal room temperature and with easily accessible equipment. The book will prove its worth again and again as a regular source of reference for planning lessons.

Under the Chinaberry Tree Nov 25 2019 Celebrating Chinaberry's twentieth anniversary, the women behind America's beloved children's book catalog share their wisdom about the joys of children's literature and parenting. The Chinaberry catalog was created when Ann Ruethling became troubled by the violence in many old-fashioned nursery stories and the poor grammar or mediocre plots in newer children's books. Handpicking a hundred high-quality titles a year, she has become an indispensable friend to thousands of parents, and Chinaberry has become a gold standard for its industry. Under the Chinaberry Tree celebrates the world of children's books. In warm "one-mother-to-another" prose, Ruethling and her business partner, Patti Pitcher, reflect on the family-first concepts that resonate so strongly with Chinaberry fans and all parents. Exploring the books that have made a difference in their children's lives, the tender experience of reading with children and the moments that make parenting a unique journey, this guide is sure to enrich every family's bookshelf.

After graduating from Le Cordon Bleu in Paris, writer Kathleen Flinn returned with no idea what to do next, until one day at a supermarket she watched a woman loading her cart with ultraprocessed foods. Flinn's "chefternal" instinct kicked in: she persuaded the stranger to reload with fresh foods, offering her simple recipes for healthy, easy meals. The Kitchen Counter Cooking School includes practical, healthy tips that boost readers' culinary self-confidence, and strategies to get the most from their grocery dollar, and simple recipes that get readers cooking.

The Measurement of Household Welfare Apr 11 2021 The measurement of household welfare is one of the most compelling yet demanding areas in economics. To place the analysis of inequality and poverty within an economic framework where individuals are making decisions about current and lifetime incomes and expenditures is a difficult task, made all the more challenging by the complexity of the decision-making process in which households are involved and the variety of constraints they face. This 1994 book examines the conceptual and practical difficulties of making inferences from observed behaviour. It addresses the problems of making comparisons across a range of very different households and discusses how data for such comparisons should be collected. The contributions, from experts from Europe, North America and Australia, have the unifying theme that there is a strong relationship between theoretical concepts from microeconomics and the appropriate use of micro data in evaluating household welfare.

Computation and the Humanities Jun 01 2020 This book addresses the application of computing to cultural heritage and the discipline of Digital Humanities that formed around it. Digital Humanities research is transforming how the Human record can be transmitted, shaped, understood, questioned and imagined and it has been ongoing for more than 70 years. However, we have no comprehensive histories of its research trajectory or its disciplinary development. The authors make a first contribution towards remedying this by uncovering, documenting, and analysing a number of the social, intellectual and creative processes that helped to shape this research from the 1950s until the present day. By taking an oral history approach, this book explores questions like, among others, researchers' earliest memories of encountering computers and the factors that subsequently prompted them to use the computer in Humanities research. *Computation and the Humanities* will be an essential read for cultural and computing historians, digital humanists and those interested in developments like the digitisation of cultural heritage and artefacts. This book is open access under a CC BY-NC 2.5 license

Different Faces of Attachment Mar 30 2020 Attachment between an infant and his or her parents is a major topic within developmental psychology. An increasing number of psychologists, evolutionary biologists and anthropologists are articulating their doubts that attachment theory in its present form is applicable worldwide, without, however, denying that the development of attachment is a universal need. This book brings together leading scholars from psychology, anthropology and related fields to reformulate attachment theory in order to fit the cultural realities of our world. Contributions are based on empirical research and observation in a variety of cultural contexts. They are complemented by careful evaluation and deconstruction of many of the underlying premises and assumptions of attachment theory and of

conventional research on the role of infant-parent attachment in human development. The book creates a contextual cultural understanding of attachment that will provide the basis for a groundbreaking reconceptualization of attachment theory.

The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition Dec 27 2019 Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial

psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

Four girls. One unforgettable July. Britta is the bubbly drama queen. She needs to get away—and a peaceful cabin in the woods sounds like the perfect escape. Meredith is the overachiever. She's spent her entire life preparing for college, but at what cost? Now she's wondering if that's all there is. Kate is the reluctant socialite. She's searching for a reason to begin again after fleeing her small Georgia town—and a shameful family secret. Spider is the quiet intellectual. Hidden History of Flint Jun 25 2022 "Beneath Flint's auto history lies a buried past. Local Civil War hero Franklin Thompson was actually Sarah Edmonds in disguise. Thread Lake's Lakeside Amusement Park offered seaplane rides and a giant roller coaster partly built over the water before closing in 1931. Smith-Bridgman's, the largest department store in town, reigned supreme for more than a century at the same location. And the city's most prolific inventor, Lloyd Copeman, created the electric stove, flexible ice cube tray and automatic toaster. Gary Flinn showcases the obscure and surprising elements of the Vehicle City's past, including how the 2014 water crisis was a half century in the making."-- Page [4] of cover.

Second Time's a Charm Aug 03 2020 Forgiveness is easy. Trust is harder. Stacie Edmonds, fiercely

independent and too much fun for her own good, is about to turn forty, although she looks twenty-five. The Sound Side, her marina-turned restaurant, a diamond in the rough on the backside of the island known as Kill Devil Hills, has been her place for three years. Ever since Rick, Stacie's ex-husband, had driven them apart by his errant lifestyle, culminating in an affair, Stacie has been making it the kind of place where everyone wants to be in the summer on the Outer Banks of North Carolina. While Stacie has been focusing on running her restaurant, Tyson Garrett, her chef and ten years her junior, has been focusing on her, biding his time until the right moment to make his move. One problem looms large: Tyson wants a family and Stacie is unsure if she can bear the child they both want. Is it fair to let him love her? Can she trust again? *Second Time's a Charm* is a story of rediscovering love and trust, of mastering destiny, of taking second chances, of forgiveness and redemption. Stacie and Tyson's story is hardly a new twist on an old problem, but readers may sympathize with them as they encounter the realistic struggles of dealing with disillusionment, waning hope, and floundering in the doldrums of life without purpose or joy. While a stand-alone novel, *Second Time's a Charm* also reintroduces Kyle, Stacie's nephew, and his girlfriend Chelsea and other familiar characters from Mary Flinn's previous novel *The One*. Readers of *The One* will be thrilled to learn more about Stacie and Tyson, while new readers will discover new friends in these pages.
