[Major Varieties and Constant Plate Flaws of Russian Imperial Stamps \(1857-1917\)](#) Apr 30 2022 Until now, detailed information about the stamps of Imperial Russia could only be found by consulting multiple sources that are often obsolete, difficult to find, lacking in detail, inconsistent in their listings, and overwhelmingly published in Russian. This makes it hard for collectors--especially those not fluent in Russian--to identify and value varieties of these stamps. This is the first comprehensive, illustrated, and English language summary of available information about all stamps issued in the Russian Empire from 1857 to 1917, their varieties, color shades, perforations, watermarks, and constant plate flaws. Each individual stamp is listed separately, followed by a systematic description, including * a color illustration, * the year of issue, * paper, sheet format, and watermark information, * perforation and printing characteristics, * designer and engraver names, * original sources of images (where applicable), * print runs, * color shades,

* major varieties and known constant plate flaws, * specimens, * multiples. Approximate retail values given in U.S. dollars or as multipliers of the catalog value of the basic stamp. Varieties are carefully described and, where possible, illustrated. Several tables and graphic aids are provided to allow stamps having multiple subtle differences to be quickly identified and valued. After consulting this catalog, you will finally really know what stamps are in your collection of pre-1917 Russian issues.

Aircraft and Aviation Stamps Aug 03 2022 The author has combined his two greatest interests: Transport and Stamp Collecting and brought them together in this series of books looking at the way postage stamps have led him to increase his knowledge of our world via his interest in all forms of transport world-wide. Philately (the collecting of stamps) itself is a fascinating hobby looking at the development of postal services in all its forms, designs of stamps that have evolved the Victorian Penny-Black to today's creations, often artistic but dependant more and more on photography with greater or lesser degrees of digital manipulation. In his quest he has covered many unusual places that have only become more accessible with the advent of cheap air travel but has still found it necessary to use his own contacts, library of related books and more recently the internet to research his subject. Like all books in this series, they been laid out as global tour starting naturally in the UK and then travelling in an easterly direction through

every continent – without, it should be added, crossing the International Date Line! Readers will not find every country included but a differing selection in each volume.
