The Business of Data Sep 20 2019 This book is about the rise of data as a driver of innovation and economic growth. It charts the evolution of business data as a valuable resource and explores some of the key business, economic and social issues surrounding the data-driven revolution we are currently going through. Readers will gain an understanding of the historical underpinnings of the data business and why the collection and use of data has been driven by commercial needs. Readers will also gain insights into the rise of the modern data-driven technology giants, their business models and the reasons for their success. Alongside this, some of the key social issues including privacy are considered and the challenges these pose to policymakers and regulators. Finally, the impact of pervasive computing and the Internet of Things (IoT) is explored in the context of the new sources of data that are being generated. This book is useful for students and practitioners wanting to better understand the origins and drivers of the current technological revolution and the key role that data plays in innovation and business success.

SO YOU WANT TO BE AN ENGINEER May 29 2020 Are you considering a College Major in Engineering, but wondering whether and how to plan for a successful career? Dan Heflin is here to help, with perspectives and guidance gained from 65 years of experience. Having entered the Marine field as a wide-eyed novice, he knows how valuable it was to have the mentorship and tutelage of veteran tradesmen, designers, managers, and engineers—which eventually resulted in promotion to Director of Engineering Services. After retirement from the shipyard, he and a uniquely qualified veteran naval architect formed an independent consulting company, offering services across a wide range of technical and management issues, which further broadened his experiences well beyond design and manufacturing. If this level of engagement and challenge sounds exciting, then this is the book for you! Both pragmatic and encouraging, Dan asks the aspiring engineer to examine personal characteristics such as depth of curiosity, tenacity, patience, aptitude for mathematics, concentration, and the ability to prioritize. Unique characteristics of different fields of engineering are reviewed, and Dan stresses the importance of sophomores and juniors reviewing their experiences to date, to confirm or change the chosen field of specialization. Dan draws upon decades of personal experience to maximize benefits and minimize disappointments in college, employment, and beyond.

All change please! - challenges and opportunities of the energy transition Aug 24 2022 The annual meeting of the ARLs Junges Forum forum for young professionals on 6-8 October 2016 in Leipzig addressed various aspects of the energy transition-when, where, how and why? In presentations and discussion groups, they considered not only technical, legal and planning aspects related to infrastructure expansion and the management and structuring of the energy transition, but also its significance for spatial development. The focus of the annual meeting was selected in view of the current importance of the issue. The transition is a process intended to ensure a safe, environmentally friendly and economically successful future and as such involves a broad spectrum of social, planning and scientific challenges and opportunities that require more in-depth consideration and analysis. The following questions thus provided the starting points for the presentations: What are the key action areas for the implementation of the energy transition? How will the cities and the countryside of the future look? How do the various actors behave and how do they react to different technologies? Where and why do conflicts and competition emerge and how can resistance and acceptance be dealt with? These key questions were the focus of the annual meeting and informed the following themes: How smart is the city of the future? Pole position for new form: of mobility and We say no! - public protest in the energy transition.

Children's Work and Opportunities for Education Nov 22 2019 Millennium Development Goals, set the global agenda for human development in order to improve the well-being of populations, and in doing so, assigned priority to children. When stakes in global economic competition are too high, and when resources are limited, expanding opportunities of future generations becomes all the more crucial for the developing countries. Children's work, as much as it may carry an economic value, is also a social relation, and this book attempts to show that cross-cultural diversity in children's lives need not prevent identifying and studying the common factors that affect children. The main argument of the book is that focusing attention only on the child's labor market participation provides only a partial understanding of the variety of work children perform and of the conditions under which the right to education continues to be only a dream for many children. This book targets the students interested in development economics, professionals who work with child laborers, and activists who promote schooling in developing countries.

company needs a good Global marketing strategy if it wishes to enter the international arena with its products and services. This is the process of being able to adjust a company's marketing strategy to allow it to adapt in countries different to that of the home country. This strategy will vary from region to region based on different aspects of the chosen target market and country. The purpose of this report is to identify the global challengers, composed of threats and opportunities that a firm from a rapidly developing economy faces alongside providing indications on how to help this firm become a global player. This report will emphasise on a firm from a rapidly developing economy which is Grupo Mexico, a mining company which is located in Mexico. It will look at the background of the company and what has enabled this company to succeed in such a competitive industry domestically and internationally. Throughout the basis of such research this will then build upon developing an outline global marketing strategy to challenge its competitors within the market. Future supplies of non-renewable resources get harder to obtain every time a location is depleted of its natural resource. Identifying what resources are needed and the capabilities available to a firm enable it to enter a very competitive yet lucrative market. With natural resources being very scarce to find and very difficult to extract becomes a great challenge to companies working in this sector. Although this is a difficult process, Chibana (2017) states that natural resources make the world go around which suggest the world's requirement for such commodity is greater than any other which indicate that customer wants and needs for this product are high. The company Grupo Mexico is vastly divers

Constraints and Opportunities of Leadership in Post-Communist Europe Mar 19 2022 Taking Slovakia as a case study, this volume investigates the role of leadership and political leaders in post-communist Europe. In particular it explores the role played by the three-time Prime Minister Vladimir Meciar in determining the course of Slovak politics in the 1990s. Building on the concepts of "constraint" and "opportunity" and the strategic-relational approach, Tim Haughton advances an arena-based model of leadership. The volume will be of particular interest to advanced students of Central and East European politics and political scientists interested in issues of leadership. Contents: Introduction: Assessing the role of political leaders in a post-Communist country; The leader and his party; The leader and the coalition; The leader and the institutional framework of politics; The leader and public opinion; The leader and the wider world: the role of the international environment; Putting Meciar in comparative perspective: the role of political leaders in post-Communist Europe; Bibliography; Index.

The Future of Doctoral Research Mar 27 2020 This book explores the future of doctoral research and what it means to be involved in all stages of the process, providing international insights into what's changing, why it's changing and how to work best with these changes. It looks at the key issues that have been thrown into sharp relief by crises such as world pandemics. Drawing on work from outstanding authors, this book shows the ways in which the doctoral process has altered the supervisor/supervisee model, the challenges that now need to be managed and demonstrates the importance of aligning all the stakeholders, systems and processes to ensure a successful future for doctoral education. Bringing together a range of perspectives, innovative practices and rigorous research this book tackles topics such as: how doctoral research changes in keeping with the global expansion and transformation of doctoral education programs the significant influence funding bodies - be they charities, governments, businesses, or non-governmental agencies - can have on doctoral research the extent to which doctoral research penetrates daily life and vice versa, and how to encourage and embed an ethical approach to research, as well as university responses to external challenges. Uniquely international and bringing together the many stakeholders in the research business, this book is essential reading for all doctoral supervisors, candidates, and anyone involved in designing or organising research programmes for early career researchers and doctoral students.

Challenges and Opportunities of Circular Economy in Agri-Food Sector May 21 2022 Global population by 2050 is predicted to be over 9 billion and accordingly, the production systems will demolish about 140 billion tons per year of minerals, ores, fossil fuels and biomass, i.e., thrice of the current need, and the food production itself has to be doubled. Optimized resource usage, lifecycle management, and reduced carbon emission have become a priority for agri-food businesses today, and circular economy (CE) helps for a sustainable and flexible way to grow without exhausting primary materials, and it thinks beyond recycling and resource usage. The word CE best relates to the resource and efficiency management, 6Rs, closed-loop production systems, zero waste and lifecycle engineering, reduced overconsumption of resources and waste generation, enriched system redesign and business model innovation, thereby leading to sustainable development goals. In this light, the book calls for theoretical and empirically sound contributions that are focused on the different aspects of the circular economy, 6R's, sustainable production and consumption, closed-loop systems, etc. in the agri-food sector.

Employee Surveys and Sensing Dec 04 2020 "This volume comprises 27 chapters focused on the design and execution of employee survey programs. These chapters reflect the latest advances in technology and analytics, and reflect a pervasive emphasis on driving organizational performance and effectiveness. The individual chapters represent the full range of survey-related topics, including design, administration, analysis, feedback, and action taking. The latest methodological trends and capabilities are discussed including computational linguistics, applications of artificial intelligence, and the use of qualitative methods such as focus groups. Extending beyond traditional employee surveys, contributions include the role of passive data collection as an alternative or supplement in a comprehensive employee listening system. Unique contextual factors are discussed including the use of surveys in a unionized environment. Individual contributions also reflect increasing stakeholder concerns for the protection of privacy among other ethical considerations. Finally, significant clarifications to the literature are provided on the use of surveys for measuring organization culture, strategic climate and employee engagement"--

Museums and Higher Education Working Together Oct 14 2021 Over the last twenty years the educational role of the museum has come to be central to its mission. There are now far more educational opportunities, new spaces, new interfaces - both digital and physical, and a growing number of education and interpretation departments, educational curators and public engagement programmes. Despite these developments, however, higher education has remained a marginal collaborator compared to primary and secondary schools and to other forms of adult learning. This has meant that the possibilities for partnerships between universities, colleges, museums and galleries has remained relatively unexplored, especially in relation to their potential for generating innovative patterns of research and learning. This book addresses the key issues which are preventing such partnerships and examines how to enable more effective and creative connections between museums and higher education. The authors identify conceptual and practical barriers and explore whether current academic models are fit for purpose. They argue that as pressures mount on public educational resources around the world, there needs to be an urgent increase in the exchange of knowledge across these sectors and the forging of world-class scholarly partnerships. Examples of research undertaken internationally offer best practice models for collaboration and integration. This book will be compulsory reading for museum and educational specialists and those interested in engaging in museum/higher education partnerships. It will also be of interest to those involved in policy and decision-making in education, the museum sector and national and local government.

THE OPPORTUNITIES OF UNCERTAINTIES: FLEXIBILITY AND ADAPTATION NEEDED IN CURRENT CLIMATE Volume II (ICT and Engineering) Jul 11 2021 IOTA is a novel cryptocurrency that uses distributed ledger technology based on directed acyclic graph data structure. Security of cryptocurrencies ought to be scrutinized in order to acquire esteemed security, attain trust, and accomplish indelible adoption. Although IOTA prefers resilient security controls, IOTA security is not yet well explored. Among all the propounded IOTA vulnerabilities that have been identified, we pragmatically exploit replay attack against IOTA. It further analyzes the attack to perceive its impact. Attack methodology and proof of concept for the replay attack is presented. Our proposed exploitation methodology is based upon address reuse, while IOTA in default mode does not reuse addresses. Distrust and privation of balance can be some of the severe impacts of this vulnerability. This system introduces the Crypto Terminal, a new open device for securing blockchain wallets.

Handbook of Research on Analyzing IT Opportunities for Inclusive Digital Learning Jul 19 2019 The outbreak of the pandemic around the world came with national measures to deal with the health emergency that caused and will continue to cause important disruption in education for students, teachers, and policymakers. Digital technologies can provide innovative solutions that can prevent the negative effects of lockdowns of countries and regions on education. It is important to analyze digital solutions and experiences for distance learning and to better understand the available resources and best practices to deal effectively with the challenges of digital learning for both learners and academic staff. It is important that countries promote digital excellence and explore the opportunities that information technologies can provide to education institutions, especially in the post-pandemic scenario, and the major transformations it will bring to citizens, societies, and economies. The Handbook of Research on Analyzing IT Opportunities for Inclusive Digital Learning explores the new demands of labor markets in the digital economy, how educational institutions can respond to these new opportunities and threats, the development of new teaching and learning methods, and finally, the development of digital skills and competences. It also discusses the challenges and opportunities caused by the pandemic in the area of education and how information technologies can transform education and develop a new workforce with the required digital skills and competences and knowledge to fit the post-pandemic labor market. This book highlights topics including knowledge management systems, learning technologies, personalized learning, and more within the context of diverse student populations. It is a valuable reference tool for academics, researchers, lecturers, decision makers, policymakers, and practitioners interested in new theories, research findings, and case studies for understanding inclusive digital learning and the opportunities for digital technologies in education.

Education in Europe Oct 22 2019 This book is a comprehensive collection of chapters focusing on current techniques and strategies in education policy planning and application, summarizing the debate for the future and prospects of education, within the current socio-economic development and growth spectrum. This book considers a broad perspective to increase the information base and derive broader conclusions about education policies and activities. More specifically, this book presents a discussion of the environment, institutions and education policy issues, focusing on the institutional setting, as well as literature relating to education policy and practice. Moreover, this book identifies and examines relevant key research issues, building a conceptual framework drawing on the application of education and socio-economic development and growth process, enabling a comparative analysis in European level, explaining also any related socio-economic consequences. This book also presents a survey of the choices concerning education policy regarding development and efficiency enhancement, describing the instruments, the actors involved, the actions undertaken, and those which, although promoted in the context of other policies, affect the same channels or pursue similar aims. Moreover, this book explores and studies core dimensions of the interaction between education, research and development, efficiency, new paradigms, methods and techniques along with socio-economic links. Overall, this book describes the main kinds of policy interventions that are implemented, providing at the same time some useful elements, in order to understand the assumptions and theories which underpin them. This book fills a gap in education literature by exploring and studying various dimensions of the interaction between one of the most important socio-economic aspects, namely education, and interactions between related factors (both theoretically and empirically). Special focus is put on the appreciation of the ways in which education activities and policies change and adapt in the presence of new constraints of changing configurations of the knowledge-based economy combined with the emergence and adaptation of institutional or economic structures. Within this framework, this book acts as a platform for theoretical and empirical research, rendering a creative source for motivation, scientific dialogue, collaborative approaches, as well as knowledge creation and dissemination. To achieve its aims, the book consists of seven chapters by fifteen expert contributors.

Wildcheck – Assessing the risks and opportunities of trade in wild plant ingredients Apr 20 2022 Thousands of consumer products around the world contain ingredients obtained from wild plants. Wild harvest accounts for some or all the harvest of the great majority of plant species in trade (between 60-90 percent). Wild-harvested plants often come from the most biodiverse ecosystems on earth and many have been used traditionally or by local communities for generations. While these products have global markets and provide critical sources of income, they can also have deep ties to particular cultures and places. Demand for wild plant ingredients is growing rapidly, having grown by over 75 percent in value over the past two decades. Thousands of harvested species are at risk mainly from a combination of overharvest and habitat loss: of the 21 percent of medicinal and aromatic plant species whose threat status has been assessed, 9 percent are considered threatened with extinction. Despite their ubiquity, importance, and the threats facing them, wild plant ingredients are often obscured from consumers and escape companies' due diligence due to a lack of awareness and traceability. Best practice standards exist but have yet to capture a significant portion of the market. This report aims to address these challenges by making information on a selection of 'flagship' wild plant ingredients, the Wild Dozen, readily available and easy to understand. By offering this information without obligation to a specific prescription for follow-up action (e.g. through certification or policy change), it is hoped that a wide range of users will access the report as a first step towards responsible sourcing. Along with a broader update on the state of wild plants trade, the report provides a 'profile' on each of the Wild Dozen species, summarising key facts on production and trade. Each profile contains a traffic-light risk rating on biological and social factors, along with an overview of opportunities for responsible sourcing. The information is aimed at industry, consumers, policy-makers, investors, and practitioners, concluding with a summary of what these various stakeholders can do to contribute to a sectoral shift towards responsible sourcing of wild plant ingredients.

Public Health in Developing Countries May 09 2021 Public health entails the use of models, technologies, experience and evidence derived through consumer participation, translational research and population sciences to protect and improve the health of the population. Enhancing public health is of significant importance to the development of a nation, particularly for developing countries where the health care system is underdeveloped, fragile or vulnerable. This book examines progress and challenges with regards to public health in developing countries in two parts: Part 1 "General and Crosscutting Issues in Public Health and Case Studies" and Part 2 "Country-Specific Issues in Public Health." For example, assuring equity for marginalized indigenous groups and other key populations entails the application of transdisciplinary interventions including legislation, advocacy, financing, empowerment and de-stigmatization. The diverse structural, political, economic, technological, geographical and social landscape of developing countries translates to unique public health challenges, infrastructure and implementation trajectories in addressing issues such as vector-borne diseases and intimate partner violence. This volume will be of interest to researchers, health ministry policy makers, public health professionals and non-governmental organizations whose work entails collaborations with public health systems of developing nations and regions.

How Non-Permanent Workers Learn and Develop Apr 27 2020 How Non-Permanent Workers Learn and Develop is an empirically based exploration of the challenges and opportunities non-permanent workers face in accessing quality work, learning, developing occupational identities and striving for sustainable working lives. Based on a study of 100 non-permanent workers in Singapore, it offers a model to guide thinking about workers' learning and development in terms of an 'integrated practice' of craft, entrepreneurial and personal learning-to-learn skills. The book considers how strategies for continuing education and training can better fit with the realities of non-permanent work. Through its use of case studies, the book exams the significance of non-permanent work and its rise as a global phenomenon. It considers the reality of being a non-permanent worker and reactions to learning opportunities for these individuals. The book draws these aspects together to present a conceptual frame of 'integrated practices', challenging educational institutions and training providers to design and deliver learning and the enacted curriculum not as separate pieces of a puzzle, but as an integrated whole. With conclusions that have wider salience for public policy responses to the rise of non-permanent work, this book will be of great interest to academics and researchers in the fields of adult education, educational policy and lifelong learning.

Circular Economy Nov 03 2020 How can we design circular business models? How can we organize the transition from a linear to a circular economy? And how can we imagine circular futures that help us transform current realities? This book aims to provide answers to these questions while addressing the challenges and opportunities of the circular economy. The authors reflect on why conventional sustainability models - such as the 'triple P' (People, Profit, Planet) or eco-efficiency - have failed in addressing environmental challenges including climate change, biodiversity loss, and pollution. They then move on to explore innovative circular business models, which propose to eliminate environmental damage by radically reforming the system of industrial production. Organizing the transition is a collaborative effort: entrepreneurs, consumers, policymakers, multinationals and intermediaries need to work together to foster the emergence of the circular economy as an institutional field. Together with younger generations of learners and equipped with beyond-human centred values towards awareness of the material and natural world, novel circular futures can be imagined. Offering points of reference for continued critical discourse and examples of practically applicable sustainability solutions, this book will be of great interest to students, teachers, practitioners and scholars of circular economy.

Limits and Opportunities of a Matrix Organization Oct 26 2022 This book investigates the functioning of contemporary matrix organizations based on a case study of a German leading commercial vehicle manufacturer. It creates a framework for research of matrix organizations and demonstrates empirically how a contemporary MNC can promote lateral coordination through the use of a matrix organization. The significant issues of decision-making and conflict in matrix structures, as well as the role of organizational cultures is analysed. The importance of boundary spanning as well as the boundary spanning skills needed and developed by a matrix organization have been identified. This work brings significant empirical understanding of matrix organizations thanks to a rich research field combined with a novel framework for analysis of matrix organizations.
