*Paesaggi fatti a mano* Aug 29 2019 L'autrice ci mette davanti ad un cambiamento del comportamento nel rapporto dell'umanità nei confronti delle problematiche della pianificazione. [...] Certo gli umani sono capaci di fare un paesaggio a mano, potrebbe addirittura essere una delle più belle maniere di agire sul territorio. (dalla presentazione di Gilles Clément) Fausta Occhipinti con "Paesaggi fatti a mano" ci propone un tema ambizioso, una sistematica revisione dei metodi e degli strumenti dello studio del paesaggio nell'università italiana, partendo dall'intuizione che sia necessario introdurre una sperimentazione applicata in costante confronto con i corsi teorici, e questo nel momento più recessivo della nostra storia recente, mentre il nostro Paese sta

meticolosamente disinvestendo sul paesaggio, revocando anche quel poco che si era fatto, in particolare nelle scuole di architettura. (dalla presentazione di Franco Zagari) Come si diventa paesaggisti? Come si insegna il progetto di paesaggio? Questo ebook indaga il ruolo strategico della didattica di terreno nelle scuole di architettura del paesaggio in Europa. La ricerca mette in luce la relazione tra la formazione del paesaggista e il suo riconoscimento istituzionale in diversi contesti europei, con particolare riferimento a quello italiano e francese. Ne emerge che la scuola del paesaggio ideale dovrebbe intensificare l'interdisciplinarietà applicata a casi reali, sperimentando sul campo, e orientare il progetto verso una committenza reale, migliorando il rapporto tra scuola e istituzioni, mondo professionale e società.

*Storia della cucina - La cucina medievale* May 31 2022 Questo testo è frutto di una ricerca su svariati testi di cui è data ampia bibliografia. Contiene una panoramica delle grandi cucine dell'antichità ed in particolare dell'epoca medievale ma con riferimenti anche alla cucina dell'antica Roma e quella Rinascimentale. Si descrive anche l'evoluzione della tavola e delle abitudini alimentari degli antichi con riferimento alle stoviglie ai metodi di cottura e alla profonda differenza fra il mangiare dei poveri e quello dei ricchi per i quali il banchetto era anche una dimostrazione di fasto e di ricchezza. Si descrivono anche alcuni piatti legate a personaggi famosi e la trascrizione di ricette originali più o meno modificate per renderle appetibili alle mutate abitudini culinarie del tempo attuale.

**Giardinosophia** Oct 12 2020 In un continuo gioco di riflessi, l'umanità ha sempre rispecchiato se stessa nel giardino. Di volta in volta l'architettura del verde, al pari dell'architettura costruita, ha incarnato ideali, vagheggiato utopie, soddisfatto desideri e affrontato paure. Rispetto a templi, abitazioni e città, però, nei giardini l'uomo non ha trovato solo un ambito privilegiato per riflettere, ma anche un interlocutore capace come nessun altro di lanciargli sfide e spalancargli opportunità: la natura - mistero da esplorare e allo stesso tempo fonte di piacere; ora materia da plasmare, ora maestra e fonte di ispirazione. Questa Giardinosophia, primo trattato esaustivo sulle filosofie che hanno preso forma nel giardino, non è quindi solo una disamina di come il pensiero umano ha percorso e dato vita alle tante e diversissime espressioni dell'architettura verde, ma, cosa più interessante e - per come la si vede emergere da queste pagine - stupefacente, di come e quanto l'idea di giardino abbia a sua volta influenzato la storia del pensiero. Da Oriente a Occidente, dai tempi più remoti fino all'attualità dei nostri giorni, la natura ha parlato ai filosofi, ai poeti, agli artisti, a tutta l'umanità attraverso l'opera dei giardinieri, portatori di un messaggio che affonda le radici nella nostra più autentica, intima essenza.

*The Politics of Water in the Art and Festivals of Medici Florence* Jul 29 2019 This book tells the story of one dynasty's struggle with water, to control its flow and manage its representation. The role of water in the art and festivals of Cosimo I and his heirs, Francesco I and Ferdinando I de' Medici, informs this richly-illustrated interdisciplinary study. Else draws on a wealth of visual and documentary material to trace how the Medici sought to harness the power of Neptune, whether in the application of his imagery or in the control over waterways and maritime frontiers, as they negotiated a place in the unstable political arena of Europe, and competed with foreign powers more versed in maritime traditions and aquatic imagery.

**Architectural Graphics** Jan 15 2021 This book reports on several advances in architectural graphics, with a special emphasis on education, training and research. It gathers a selection of contributions to the 19th International Conference on Graphic Design in Architecture, EGA 2022, held on June 2-4, 2022, in Cartagena, Spain, with the motto: "Beyond drawings. The use of architectural graphics".

*Medici Gardens* Apr 17 2021 Medici Gardens challenges the common assumption that such gardens

as Trebbio, Cafaggiolo, Careggi, and Fiesole were the products of an established design practice whereby one client commissioned one architect or artist. The book suggests that in the case of the gardens in Florence garden making preceded its theoretical articulation.

*Cosimo I De' Medici and His Self-Representation in Florentine Art and Culture* Dec 26 2021 In this study, Henk Th. van Veen reassesses how Cosimo de' Medici represented himself in images during the course of his rule. The text examines not only art and architecture, but also literature, historiography, religion, and festive culture.

*Venus and the Arts of Love in Renaissance Florence* Oct 31 2019 In this volume, Rebekah Compton offers the first survey of Venus in the art, culture, and governance of Florence from 1300 to 1600. Organized chronologically, each of the six chapters investigates one of the goddess's alluring attributes - her golden splendor, rosy-hued complexion, enchanting fashions, green gardens, erotic anatomy, and gifts from the sea. By examining these attributes in the context of the visual arts, Compton uncovers an array of materials and techniques employed by artists, patrons, rulers, and lovers to manifest Venusian virtues. Her book explores technical art history in the context of love's protean iconography, showing how different discourses and disciplines can interact in the creation and reception of art. *Venus and the Arts of Love* offers new insights on sight, seduction, and desire, as well as concepts of gender, sexuality, and viewership from both male and female perspectives in the early modern era.

*Performance and Appropriation* Jun 07 2020 Breaking with the idea that gardens are places of indulgence and escapism, these studies of ritualized practices reveal that gardens in Europe, Asia, the United States, and the Caribbean have in fact made significant contributions to cultural change. This book demonstrates methods and the striking results of garden reception studies. The first section explores how cultural changes occur, and devotes chapters to public landscapes in the Netherlands, seventeenth-century Parisian gardens, Freemason gardens in Tuscany, nineteenth-century Scottish kitchen gardens, and the public parks of Edo and modern Tokyo. The second part provides striking examples of construction of self in vernacular gardens in Guadeloupe and American Japanese-style gardens in California. Finally, the third section analyzes struggles for political change in gardens of Yuan China and modern Britain.

**Graphical Heritage** Mar 05 2020 This book presents the proceedings of the 18th International Conference on Graphic Design in Architecture, EGA 2020, focusing on heritage - including architectural and graphic heritage as well as the graphics of heritage. This first volume gathers selected contributions covering theories, and new technologies and findings to help shed light on current questions related to heritage. It features original documentation studies on historical archives, 3D and solid representation of architectural objects, as well as virtual graphic representation and applications of augmented reality, all documenting and/or reconstructing the present, past and future of architectural objects. As such, this book offers extensive and timely information to architectural and graphic designers, urban designers and engineers, and industrial designers and historians.

The Ultimate Italian Nov 12 2020 This book shows how Dante Alighieri has been represented in the Italian collective imagination from the late eighteenth century to the present day. Often held to be a precursor of Italian unity, the author of the Divine Comedy has been put forward both as a standard-bearer of a secular, anti-clerical Italy and the embodiment of the concept of a deeply religious and Catholic nation; while he was later adopted by nationalist and fascists as well as a pop icon in the age of the internet and globalization. The book describes this long and fascinating history from a completely original point of view: the centuries-old myth of Dante is analysed from the perspective of cultural history. The sources employed include Dante commemorations, festivals and monuments, pilgrimages to his tomb, films and other media productions about Dante, as well as comic strips, advertisements and other cultural items dedicated to him.

*Pietro Porcinai and the Landscape of Modern Italy* Oct 24 2021 Born in Florence in 1910, Pietro Porcinai grew up on the classic grounds of the Villa Gamberaia in Settignano where his father served as head gardener. Although he studied agriculture in college, Porcinai's true interest lay in the landscape architecture practice he founded in 1938. Early projects centered in the area of Arezzo, whose style reflected modernized traditional models. In the postwar era the office flourished, producing modern gardens of remarkable design and use of plants. In these works, Porcinai convincingly demonstrated the affinity between historical architecture and landscapes uncompromisingly modern. During his long and productive career he also consulted on autostrada planning, and designed public parks, memorials, and even a Pinocchio theme park-at times collaborating with noted architects such as Renzo Piano, Carlo Scarpa and Oscar Niemeyer. This book, the first English-language study on Pietro Porcinai provides a comprehensive and richly illustrated overview of his life and remarkable achievements.

**Storia del giardino e del paesaggio** Oct 04 2022 Una rassegna di riflessioni e di documenti sui temi della storia del giardino e del paesaggio non sempre indagati nei manuali della storia del "verde". Una prima parte è dedicata ai giardini europei considerati nel loro contesto storico e paesaggistico a partire dal giardino dell'antichità e del medioevo per poi passare ai giardini delle ville medicee e alla loro fortuna europea. Seguono capitoli sulla formazione degli orti botanici, sui giardini principeschi dell'età barocca, quelli dell'Arcadia, di Capodimonte, sui parchi delle città termali degli Asburgo Lorena, e sui giardini borghesi nella Berlino del primo Novecento, fino all'esperienza di Pietro Porcinai. Quattro capitoli sulle feste nei giardini compongono la seconda parte, mentre la terza contiene approfondimenti sul giardino pensile di Babilonia, gli acquedotti,

l'archeologia, le grotte, e i vasi in terracotta. Un ricco apparato iconografico con immagini spesso inedite favorisce e accompagna la lettura dei testi nei quali il termine "giardino" è sempre affiancato a quello di "paesaggio". Due locuzioni che a ben vedere appartengono ad una stessa radice mai nettamente separata, partecipe di un medesimo divenire.

**Art of the Landscape** Jan 03 2020 Aesthetics deals with art, a human construction, but what one experiences when placed before nature is also an aesthetic feeling - the countryside is a place of reflection like no other. In *The Art of the Landscape*, Raffaele Milani interprets natural landscapes as an aesthetic category. Drawing from philosophical traditions, literature, and art, he calls the reader's attention to a special consciousness, originally established during the pre-Romantic age, that has become a distinctive feature of contemporary spirituality. Focusing on the definition of landscapes in relation to the concepts of nature, environment, territory, and man-made settings such as gardens and cities, Milani examines the origins of the predilection for natural scenery in the works of landscape painters and in travel literature. He addresses the distinctness of the aesthetic experience of landscapes, analyses the role of aesthetic categories, and explores landscape art as a medium of contemplation. What emerges is an original morphology of natural beauty derived from the scrutiny of landscape elements most frequently associated with aesthetic emotion - the colour of water and the sky, earth and stones, fire and volcanic eruptions, ruins and the mountains - an analysis especially relevant given the increasing fragility of our natural environment.

**Iconologia ed ecologia del giardino e del paesaggio** Feb 13 2021 Articoli e conferenze di Eugenio Battisti, rari o inediti, sono raccolti qui in due parti, l'una concernente il periodo dal Medioevo al Seicento, l'altra relativa a problemi urbanistici e paesaggistici dell'Otto-Novecento. Ne emerge la storia del giardino e del paesaggio, nel mutarsi delle tecniche topiarie e idrauliche e delle motivazioni culturali, per i nessi tra arti visive, letteratura, scienze naturali e agrarie, organizzazione socio-economica, crisi politiche ed ecologia. Interessato sia all'aspetto visivo artistico-architettonico dei giardini rappresentati in dipinti o tuttora esistenti, sia alle descrizioni poetiche di letterati come Petrarca, Boccaccio e gli umanisti, e delle loro fonti, specie l'Ovidio moralizzato, sia al rapporto con pratiche devozionali, laudi e inni religiosi, sia ancora alla permanenza dell'immaginario mitologico, l'autore ha applicato il metodo iconologico alla lettura di famosi testi letterari, per scoprire il reciproco interreagire di tutti questi elementi. Dal giardino analizzato come sfondo di dipinti a mo' di hortus conclusus si poté passare, secondo l'autore, al giardino come percorso, quando anche la tipologia architettonica e l'urbanistica vennero intese come soggetti suscettibili di studio iconografico, cioè come strutture simboliche significanti, quasi categorie mentali collettive inconscie. Il successivo incontro tra l'iconologia e l'ecologia, movimento moderno non altrettanto umanistico, ma di forte impegno teorico e sociale, ha favorito un atteggiamento nuovo verso la possibilità di costruire oggi giardini e di rivitalizzare la loro funzione entro il costrittivo paesaggio urbano e nella scenografia di antichi e nuovi parchi tutelati dalla legge.

**Nature and History in Modern Italy** Dec 02 2019 Is Italy il bel paese—the beautiful country—where tourists spend their vacations looking for art, history, and scenery? Or is it a land whose beauty has been cursed by humanity's greed and nature's cruelty? The answer is largely a matter of narrative and the narrator's vision of Italy. The fifteen essays in *Nature and History in Modern Italy* investigate that nation's long experience in managing domesticated rather than wild natures and offer insight into these conflicting visions. Italians shaped their land in the most literal sense, producing the landscape, sculpting its heritage, embedding memory in nature, and rendering the two different visions inseparable. The interplay of Italy's rich human history and its dramatic natural diversity is a subject with broad appeal to a wide range of readers.

**Politics and Culture in 18th-Century Anglo-Italian Encounters** Aug 22 2021 This collection addresses Anglo-Italian influences, correspondences and relationships through the lens of an expansive notion of eighteenth-century political history, explored in its fecund dialogue with cultural history. Its multifaceted approach fleshes out the idea of the Enlightenment community of people linking and sharing different forms and structures of knowledge into a comprehensive picture of the

Age of Reason. This book probes fields of great relevance for the cultural interpretation of historical experience, and composes a lively, and as yet unexplored, map of an interconnected European world. Anglo-Italian encounters are explored here primarily through the interweaving of political and cultural history, adding a valuable cog to contemporary insight into the cosmopolitan nature of Enlightenment Europe. The essays here range in scope from the public economy and international trade to finance, moral philosophy, the ethics and politics of translation, travel, the cosmopolitan impact of Italian music and taste, and the art of gardening.

**The Florentine Villa** Apr 29 2022 Scholarly and innovative with visually stunning line drawings and photographs, this volume provides readers with a compelling record of the unbroken pattern of reciprocal use and exchange between the countryside and the walled city of Florence, from the thirteenth century up to the present day. Defying the traditional and idealized interpretation of the Florentine Villa, the author: analyzes the economic factors that powered the investment in and building of country houses and estates from the early Renaissance times onwards, as well as the ideology and the architectural and literary models that promoted the Florentine villa explores the area between Florence and Sesto in its history, morphology and representation looks at the villas existing in the area. A contribution to the protection of the important cultural heritage of the landscape in the Florentine area and of its historic buildings, villas and gardens, this study makes engaging reading, not only for scholars and students in architecture, landscape design and social history, but also for the well informed reader interested in art, architecture and gardens.

**The Monster in the Garden** Nov 24 2021 In *The Monster in the Garden*, Luke Morgan develops a new conceptual model of Renaissance landscape design, arguing that the monster was a key figure in Renaissance culture and that the incorporation of the monstrous into gardens was not incidental but an essential feature.

Gardens, Knowledge and the Sciences in the Early Modern Period Sep 10 2020 This volume focuses on the outstanding contributions made by botany and the mathematical sciences to the genesis and development of early modern garden art and garden culture. The many facets of the mathematical sciences and botany point to the increasingly "scientific" approach that was being adopted in and applied to garden art and garden culture in the early modern period. This development was deeply embedded in the philosophical, religious, political, cultural and social contexts, running parallel to the beginning of processes of scientization so characteristic for modern European history. This volume strikingly shows how these various developments are intertwined in gardens for various purposes.
