----- `How hard it is to find a book to recommend to trainees, which will give them an insight into what counselling (and

psychotherapy too, for that matter) is really like. This book does exactly that.... This is a book which would be equally useful to the humanistic practitioner and the more orthodox one. The breadth of sympathy is admirable in dealing with what is common to all orientations. This is one of those rare books which does justice both to the human experiences involved in counselling and psychotherapy, and to the theory which might explain those experiences' - Changes What is the experience of counselling from the perspectives of both client and counsellor? What can be learned for the practice of counselling from an understanding of how it feels to be a client or a counsellor? Addressing these questions, central to this book are the personal accounts of individual clients and counsellors, who each relate their own very different experiences of counselling. They explore such issues as identity, expectations, trust, power and boundaries in the client-counsellor relationship. And each examines the intense personal meanings of `success' or `failure' in the client or counsellor role. An analysis of the implications for the counselling relationship concludes the volume.

### **The importance of counselling in New**

**Zealand** Sep 28 2019 Seminar paper from the year 2013 in the subject Psychology - Consulting, Therapy, grade: 1, Massey University, New Zealand, language: English, abstract: As counselling often deals with those who are vulnerable it has been characterised as a high risk professional, and as such, controversy has often surrounded the effectiveness of its methodologies (Vacc, Devaney & Brendel, 2003). Because of the wide range of theoretical and practical approaches existing in the field, there is an ever-present need to critically analyse counselling's role in society, in conjunction with the evidence to support it. This essay will explore the scientific evidence surrounding counselling in New Zealand and analyse the significance, in terms of efficiency and effectiveness, that counselling has on individuals at the psychological and emotional level. This will be done by first giving a definition of counselling alongside pointing out the differences that make it distinct from other helping professions. Second, the nature and purpose of counselling will be outlined,

alongside its intention and the prerequisites needed to facilitate interpersonal connection. Last, the value of counselling will be demonstrated by giving an analysis of the issues facing validation and then illustrating studies at both the international and national level to demonstrate clinical efficiency. It is concluded that the link between evidence-based research and counselling is one that requires stronger emphasis and through developing more counselling orientated research projects, a greater value will be able to be placed on the role of counselling role within New Zealand culture.
