Hav Feb 02 2020 A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides you through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, and a cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

**Inside ODBC** Sep 10 2020 Open Database Connectivity (ODBC) is a standard API for accessing information from different data storage formats and programming interfaces. Support for ODBC is not limited to Microsoft; it's now an industry standard that all DBMS vendors and major independent software vendors support. Inside ODBC, written by the architect of ODBC, Kyle Geiger, dispels the confusion about this technology by explaining its design, its architecture, and some of its history. Important considerations for the next release of ODBC - version 3.0 - are also covered. This is truly the inside story of ODBC, the key ingredient of next-generation client/server computing. For technical managers in corporate information systems groups, developers of ODBC-enabled drivers and applications, those involved in the process of downsizing from mainframes to distributed client/server computing, and database users who have heard of ODBC but don't really understand it, this book is essential reading.

**The Book of L** May 19 2021 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 19 1961. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "O" stands for zero context between developments. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

**Excess Baggage** Feb 25 2022 Lately, Anviksha Punjabi can't seem to get anything right. She is in the middle of ending her second marriage, is barely keeping any friends, and repeatedly getting into trouble at work. And as if all that weren't enough, she must live with her gregarious and over-bearing 67-year-old mother as a housemate. Afraid that if this goes on, she'll finally unravel completely, Anviksha decides that she needs a break - a Bollywood style, solo-trip across Europe kind of break. What she doesn't expect is that her mother, Smita Punjabi, will insist on coming along. The unlikely duo embarks on a journey complete with nudists, an unwelcome encounter from the past, a British dog named Bhindi, and several eligible bachelors, and slowly, what was supposed to be a soul-searching trip for one, turns into a life-altering experience for two.
