The European Guilds Nov 05 2022 "Guilds ruled many crafts and trades from the Middle Ages to the Industrial Revolution, and have always attracted debate and controversy. They were sometimes viewed as efficient institutions that guaranteed quality and skills. But they also excluded competitors, manipulated markets, and blocked innovations. Did the benefits of guilds outweigh their costs? Analyzing thousands of guilds that dominated European economies from 1000 to 1880, The European Guilds uses vivid examples and clear economic reasoning to answer that question. Sheilagh Ogilvie's book features the voices of honorable guild masters, underpaid journeymen, exploited apprentices, shady officials, and outraged customers, and follows the stories of the "vile encroachers"--Women, migrants, Jews, gypsies, bastards, and many others--desperate to work but hunted down by the guilds as illicit competitors. She investigates the benefits of guilds but also shines a light on their dark side. Guilds sometimes provided important services, but they also manipulated markets to profit their members. They regulated quality but prevented poor consumers from buying goods cheaply. They fostered work skills but denied apprenticeships to outsiders. They transmitted useful techniques but blocked innovations that posed a threat. Guilds existed widely not because they corrected market failures or served the common good but because they benefited two powerful groups--guild members and political elites."--Rabat de la jaquette.

Handicraft and guilds in the late medieval cities Sep 22 2021 Studienarbeit aus dem Jahr 2006 im Fachbereich Geschichte Europa - and. Länder - Mittelalter, Frühe Neuzeit, Note: 1,1, Fachhochschule für Wirtschaft Berlin, Veranstaltung: Unternehmen, Betrieb, Arbeit aus historischsozialwissenschaftlicher Perspektive, Sprache: Deutsch, Abstract: Handcrafts played a vital role in the cities of the medieval times. In the fourteenth century for example, about 50 percent of the citizens of Nürnberg worked in the craft business. 50 percent and more was possible for the bigger cities in those times. Because of the importance of the crafts business I will deal with this topic in my homework. In the first part I'll focus on the handicraft enterprises in the cities and their special features in the medieval times. Then I'll discuss the system of apprenticeship, because it was quite modern for those times. Furthermore I will show that the foundation of cities and the development of the handicraft contributed to each other. Afterwards I'll focus on the craft guilds. In this part of the homework I'll give you a short overview, how guilds developed and in which way they were organised. Then I'll give an overview on functions of guilds and finally I'll deal with the question, whether guilds contributed to progress or if they handicapped it.

Craft Guilds in the Early Modern Low Countries Nov 24 2021 The essays in this volume shed new light on the corporate system of guilds in the Low Countries, identifying its various features and regional variances. The contributors explore the interrelations between economic organisations and political power in late medieval and early modern towns, and address issues of gender, religion and social welfare in the context of the guilds.

Guild and State Dec 26 2021 Guild and State examines the values of social solidarity and fraternity that emerged from medieval guilds and city-communes, and the effect of traditional corporate organization of labor on socioeconomic attitudes and theories of the state. What ordinary guildsmen and townsmen thought about these issues can be gleaned from chronicles, charters, and reported slogans. But in tracing attitudes toward the guilds of early Germanic times to todays equivalent-trade unions-a distinction must be made between popular "ethos" and learned "philosophy." In Europe, from the twelfth to the seventeenth centuries, the corporate organization of labor and of town-market communities developed side-by-side with the ideals of personal liberty, market freedom, and legal equality. Self-governing labor organizations and civil freedom developed together as coherent practices. The values of mutual aid and craft honor on the one hand, and of personal freedom and legal equality on the other, formed the moral infrastructure of our civilization. Alternate ideals balanced, harmonized, and even cross-fertilized one another-as in the principle of freedom of association. Contrary to preconceptions, however, corporate values were seldom expressed philosophically in the Middle Ages. Political theory and the world of learning from the start emphasized liberal values. It was only after the Reformation that guild and communal values found expression in political theory. Even then only a few philosophers acknowledged that solidarity and exchange-the poles around which the values of guild and civil society, respectively, rotate-are not opposites but complementary, and attempted to weave these together into a texture as tough and complex as that of urban society itself. By showing that the ideals of social solidarity and workers rights have often been intertwined with liberty and equality rather than in opposition to them, this book provides an unexpected explanation and rationale for the "Third Way." The Enlightenment and industrialization led to an apotheosis of liberal values. Guilds disappeared and were only in part replaced by labor unions; the values of market exchange have since been in the ascendant-though Hegel, Durkheim, and more recently, advocates of liberal corporatism maintain the possibility of a symbiosis between corporate and liberal values. In Guild and State there emerges an alternative history of political thought, which will be fascinating to the general as well as the specialist reader.

Myth and Storm Dec 14 2020 A failed rebellion will cost more than blood. Ice, storms, sorcery, and pain separate the Karrons from those they hold most dear. With his family scattered across the farthest reaches of Ilbrea, Adrial stands alone in a capital on the brink of flames, facing the dark truth of the Guilds he cherished. Murder disguised as law. Assassins veiled by beauty. Innocents sacrificed to vile pride. A deadly plot to twist the fate of a kingdom. With each discovery, the danger grows. Enemies lurk in the shadows, and the call for freedom will not be silenced. The future of his Guild hangs in the balance, and Adrial must choose between saving the one he loves and protecting the world he's known.

Guilds, Innovation and the European Economy, 1400–1800 Sep 30 2019 For a long time guilds have been condemned as a major obstacle to economic progress in the pre-industrial era. This re-examination of the role of guilds in the early modern European economy challenges that view by taking into account fresh research on innovation, technological change and entrepreneurship. Leading economic historians argue that industry before the Industrial Revolution was much more innovative than previous studies have allowed for and explore the different products and production techniques that were launched and developed in this period. Much of this innovation was fostered by the craft guilds that formed the backbone of industrial production before the rise of the steam engine. The book traces the manifold ways in which guilds in a variety of industries in Italy, Austria, Germany, Switzerland, France, Belgium, the Netherlands, and Britain helped to create an institutional environment conducive to technological and marketing innovations.

Technique for Structuring Wildlife Guilds to Evaluate Impacts on Wildlife Communities Oct 12 2020 This paper describes a technique for ordering wildlife information according to physical strata and vegetative structure so that a variety of statistical analyses can be accomplished. Individual wildlife species are assigned to cells in a species-habitat matrix on the basis of feeding and breeding activities within physical strata in representative types of vegetative cover: the cells within the species-habitat matrix are assigned numeric values. The statistical analyses are thus based on the areas that individual species occupy within the species-habitat matrix. Computer graphics are used to represent the structure of wildlife communities and cluster analysis routines are used to describe the potential wildlife guilds that may exist in different vegetative communities. Different numbers of wildlife guilds will occur in species and presumably also of wildlife guilds present within a type of cover is modified by physical attributes of the vegetation within that cover type. The products of this analytical technique may be suitable for evaluating habitat quality, impact assessments, regional inventories and assessments of wildlife resources, and land-use planning activities.
