Principles of International Humanitarian Law Apr 30 2022 'This is a concise and nuanced overview of International Humanitarian Law (IHL). The structure is unusual. While the book reflects the state of the law with accuracy and sobriety, it nevertheless shows the idealist and philosophical ambitions of the authors. Legal issues are often discussed within a wider moral and ethical context. The authors add many basics on human rights and the enforcement of international law, which are not directly relevant for IHL, but ensure the reader understands the wider picture.'- Marco Sassòli, University of Geneva, Switzerland

The Law of Armed Conflict Aug 23 2021 This book introduces students to the essential questions of the law of armed conflict and international humanitarian law.

The Oxford Guide to International Humanitarian Law Apr 18 2021 International humanitarian law is the law that governs the conduct of participants during armed conflict. This branch of law aims to regulate the means and methods of warfare as well as to provide protections to those who do not, or who no longer, take part in the hostilities. It is one of the oldest branches of international law and one of enduring relevance today. The Oxford Guide to International Humanitarian Law provides a practical yet sophisticated overview of this important area of law. Written by a stellar line up of contributors, drawn from those who not only have extensive practical experience but who are also regarded as leading scholars of the subject, the text offers a comprehensive and authoritative exposition of the field. The Guide provides professionals and advanced students with information and analysis of sufficient depth to enable them to perform their tasks with understanding and confidence. Each chapter illuminates how the law applies in practice, but does not shy away from the important conceptual issues that underpin how the law has developed. It will serve as a first port of call and a regular reference work for those interested in international humanitarian law.

The Nature of International Humanitarian Law Sep 11 2020 This illuminating book explores the nature of international humanitarian law (IHL), so doing by asking whether it should be seen as a permissive or a restrictive regime. An experienced lawyer in the field, Anne Quintin offers an in-depth expert analysis of this highly debated topic, revealing the true nature of IHL and concluding that whilst IHL initially developed as a restrictive regime composed of prohibitions and prescriptions, it nevertheless contains within it rare permissions that allow states to act.

The Companion to International Humanitarian Law Aug 03 2022 The Companion to International Humanitarian Law offers a much-needed tool for both scholars and practitioners, supplying information accessible enough to enable a variety of users to quickly familiarise themselves with it and sufficiently comprehensive to be a source for reflection and further research for more demanding users. Its aim is to facilitate the practical application of IHL, and be of use to a wide audience interested in or confronted with IHL, ranging from professionals in humanitarian assistance and protection in the field, legal officers and advisers at the national and international level, trainers, academics, scholars, and students.

Yearbook of International Humanitarian Law, Volume 20, 2017 Jun 08 2020 The main theme of this volume of the Yearbook of International Humanitarian Law is the development and interpretation of international humanitarian law (IHL). It is elaborated upon in several chapters that examine the role of non-state armed groups in the development and interpretation of IHL, the impact of international criminal law on the development of IHL, the notion of external non-international armed conflicts, and the regulation of prolonged occupation under international law. The second theme of this volume is dedicated to targeting in armed conflicts. Specific topics include precautions in attack in urban and siege warfare, the targeting of the Islamic State's religious personnel in Iraq and Syria, and the targeting of illicit crop through aerial spraying in Colombia. Besides the chapters that address both themes, this volume also contains a Year in Review describing the most important events and legal developments that took place in 2017. The Yearbook of International Humanitarian Law is the world's only annual publication devoted to the study of the laws governing armed conflict. It provides a truly international forum for high-quality, peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by contemporary relevance, the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, civil servants, diplomats, human rights workers and students.

Advanced Introduction to International Humanitarian Law Feb 26 2022 'Robert Kolb considers that this is not an introduction for the beginner. Indeed, those seeking a descriptive summary of all the rules of humanitarian law should consult another book or the applicable conventions. For all others, however, this also an inductive, refreshing, committed, yet nuanced introduction, focussing in depth on a few, central issues, and written by one who does not only master this branch of international law, but also the relevant legal, political and historical contexts.' - Marco Sassoli, University of Geneva.

The Handbook of International Humanitarian Law Nov 06 2022 The third edition of this work sets out a comprehensive and analytical manual of international humanitarian law, accompanied by case analysis and extensive explanatory commentary by a team of distinguished and internationally renowned experts.

Applicability of International Humanitarian Law (IHL) On Non-State Actors May 08 2020 Bachelor Thesis from the year 2022 in the subject Law - European and International Law, Intellectual Properties, grade: Bachelor Degree, , course: international humanitarian law, language: English, abstract: In this paper the author addresses whether the international humanitarian law applicable in non state actors of armed conflict in the contemporary world. There is no long-lasting peace in the history of the human being. The world has passed through conflicts and wars for centuries. The Second World War was the most prominent and devastating in its nature. Millions of people were dead, world economic development being stagnated and millions of children became orphans. And hence, we peoples of the world are in a need to come up with compressive rules and procedures to govern the ongoing conflicts. That is why the International humanitarian law (here after called IHL) was designed. IHL is a subject matter that regulates the conduct of war. IHL does not prevent war from being happened, rather it regulates the conduct of already happened war and it gives equal protection to those parties which are within the conflict without a need to observe their status in order to balance military necessity and humanity. While the very nature of twenty-one century warfare has arguably undergone significant developments in recent years, it is widely noted that non-State actors actively play an increasingly substantial role in contemporary violent conflicts. Although non-State actors have been fighting against States throughout history, they were subject to domestic law enforcement. As the

nature of war evolves due to non-state actors exerting influence, and subsequently their role as agents to armed conflict become prevailing around the world. Enhancing compliance with international norms by armed non-state actors is central to efforts to improve the protection of civilians in armed conflict. Limited engagement with such actors, as well as lack of clarity as to the precise nature and extent of the international legal regimes that are apply to them; constitute significant barriers to achieving better compliance. The spectrum of new types of non-state actors is broad, “encompassing a range of identities, motivations and varying degrees of willingness and ability, to observe IHL and other international law standards.”

The Development and Principles of International Humanitarian Law Feb 03 2020
The essays selected for the first part of this volume offer an insight into the development, as distinguished from the history, of international humanitarian law. The focus of the majority of the works reprinted here is on an analysis of the adequacy of the law as it stood at the time of the respective publication and in the light of existing contemporary armed conflicts and military operations. Thus, the reader is afforded an in-depth look at the early roots of international humanitarian law, the continuing relevance of that body of law despite advances in weapons technology and the efforts to progressively develop it. International humanitarian law's development cannot be considered in isolation from its principles. The essays selected for the second part of the volume deal with the two fundamental principles underlying all of international humanitarian law: humanity and military necessity. The articles on the principles of humanity include reflections on the famous Martens Clause, and the analyses of military necessity take no account of 'Kriegsraison'. Moreover, they offer proof of the customary character of the principle of distinction in land, air and naval warfare.

Customary International Humanitarian Law Oct 25 2021
Customary International Humanitarian Law, Volume I: Rules is a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non-international armed conflicts. In the absence of ratifications of important treaties in this area, this is clearly a publication of major importance, carried out at the express request of the international community. In so doing, this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts. Comment

***Applying International Humanitarian Law in Judicial and Quasi-Judicial Bodies* May 20 2021**
The work analyzes the impact and implementation of international humanitarian law in judicial and quasi judicial bodies. Moreover, acknowledging the high impact domestic jurisdictions have in the configuration of international law, the book does not rest only in an analysis of the international jurisprudence, but delves also into the question of how domestic courts relate to international humanitarian law issues.

Development and Principles of International Humanitarian Law Mar 06 2020
The main aim of this book is to inquire into the system of norms regulating the 'internationalization' of internal conflicts. The traditional distinction between international & internal conflict, which entails different legal consequences, is in practice very difficult to detect due to the presence, in many instances, of elements typical of both situations. Through a careful & extraordinarily useful examination of all relevant cases of 'internationalized' internal conflict since 1956, the validity of the traditional framework of rules concerning foreign

intervention in internal conflict is reassessed. At the same time, the applicability to these situations of the rules typical of international conflicts are analyzed with a view to providing the existence of a continuum between the two situations, not only as a matter of fact but also with respect to their legal regulation.

International Humanitarian Law: Origins, Challenges, Prospects (3 Vols) Mar 18 2021 In three distinct volumes the editors bring together a distinguished group of contributors whose essays chart the history, practice, and future of international humanitarian law. At a time when the war crimes of recent decades are being examined in the International Criminal Tribunals for Former Yugoslavia and Rwanda and a new International Criminal Court is being created as a permanent venue to try such crimes, the role of international humanitarian law is seminal to the functioning of such attempts to establish a just world order. The events of September 2001 and the worldwide threat of terrorist attacks, bring into sharper focus questions about the ramifications of unconventional warfare and how prisoners taken in armed conflict short of declared war should be treated. Here again international humanitarian law can provide the guideposts needed to find a just course through difficult times. The intent of these volumes is to help to inform where humanitarian law had its origins, how it has been shaped by world events, and why it can be employed to serve the future.

International Humanitarian Law Sep 04 2022 'Professor Sassòli has combined his first hand experience of the challenges facing the application of international humanitarian law with his scholarly understanding of international law. He sets out the details necessary for a complete understanding of humanitarian law but also highlights the contemporary controversies. One of the many qualities of this book is that the author always offers us his considered view on what are the best solutions to the dilemmas he highlights. This book is destined to become an authoritative point of reference for generations to come.' - Andrew Clapham, Graduate Institute of International and Development Studies, Switzerland International humanitarian law (IHL) protects persons and property affected by armed conflicts. Focusing on the controversies that impact IHL in practice, this much-anticipated book from leading expert Marco Sassòli discusses when IHL applies, its substantive rules, how to ensure its respect and whether the traditional distinction between international and non-international armed conflicts remains relevant. Sassòli draws on a depth of practical experience to provide invaluable insight and comprehensive guidance on the rules protecting certain categories of persons (for example, civilians, wounded, etc.) during conflict and the rules governing different types of conduct (or example, occupation, naval warfare, etc.). The book examines how these rules interact with other branches of international law, such as human rights and international criminal law, and how the rules are applied to non-State armed groups. Cross-cutting issues, including terrorism, autonomous weapons, cyber warfare, gender and cultural heritage, are also addressed, providing readers with a well-rounded view of IHL and associated concerns. Structured in a clear and accessible way, this book will be the turn-to resource for scholars, lawyers, civil servants and other actors directly involved in the sphere of IHL. It will also be the essential text for forthcoming generations of students, giving them a solid understanding of both the rules relating to IHL and how they are implemented in practice.

The Handbook of Humanitarian Law in Armed Conflicts Jan 16 2021 This book offers the most authoritative commentary and analysis of international humanitarian law applicable in armed conflict available. It is based upon the Joint Service Regulation for the German Ministry of Defence, augmented with extensive international references, and accompanied by commentary by a team of distinguished and internationally renowned experts. Whilst the past decades have seen consistent development of international law applicable in armed conflict, culminating in a series of International Covenants and Protocols, world events in recent years have made reassessment of the law both a timely and topical concern. This Handbook available for the first time in paperback will serve as an indispensable reference source for practising lawyers and academics working in the field of international humanitarian law and for military personnel worldwide.

***International Humanitarian Law* Dec 27 2021** This book gives an up-to-date and comprehensive analysis of international humanitarian law or the laws of war. The author has traced the history of the laws of war and examined their relations with human rights and refugee laws. The topics covered include protection to the victims of war: prisoners, civilians, women, children, the natural environment and cultural property. The book contains an updated account of the functioning of the International Criminal Court, and explores the concept of command responsibility, as well as the area of private military and security companies. Besides discussing the law during air and naval warfare, the author has critically examined certain challenges which humanitarian law is facing today from cyber warfare; nuclear, phosphorous and depleted uranium weapons; the use of chemical agents; and targeted killing. This book is an invaluable resource for anyone interested or working in the field of international humanitarian law: teachers, students, lawyers, government officials, military and police personnel, researchers and human rights activists.

Gender, Conflict and International Humanitarian Law Jan 28 2022 This book conducts a gendered critique of the 'principle of distinction' in international humanitarian law (IHL), with a focus on recent conflicts in Africa. The 'principle of distinction' is core to IHL, and regulates who can and cannot be targeted in armed conflict. It states that civilians may not be targeted in attack, while combatants and those civilians directly participating in hostilities can be. The law defines what it means to be a combatant and a civilian, and sets out what behaviour constitutes direct participation. Close examination of the origins of the principle reveals that IHL was based on a gendered view of conflict, which envisages men as fighters and women as victims of war. Problematically, this view often does not accord with the reality in 'new wars' today in which women are playing increasingly active roles, often forming the backbone of fighting groups, and performing functions on which armed groups are highly reliant. Using women's participation in 'new wars' in Africa as a study, this volume critically examines the principle through a gendered lens, questioning the extent to which the principle serves to protect women in modern conflicts and how it fails them. By doing so, it questions whether the principle of distinction is suitable to effectively regulate the conduct of hostilities in new wars. This book will be of much interest to students of international law, gender studies, African politics, war and conflict studies, and international relations.

Law-Making and Legitimacy in International Humanitarian Law Jun 20 2021 International Humanitarian Law (IHL) is in a state of some turbulence, as a

result of, among other things, non-international armed conflicts, terrorist threats and the rise of new technologies. This incisive book observes that while states appear to be reluctant to act as agents of change, informal methods of law-making are flourishing. Illustrating that not only courts, but various non-state actors, push for legal developments, this timely work offers an insight into the causes of this somewhat ambivalent state of IHL by focusing attention on both the legitimacy of law-making processes and the actors involved. Investigating what law-making processes reveal about the overall state of this legal regime, this thought-provoking book shows that current developments display a far-reaching disagreement about the direction into which IHL should evolve. It explores the most relevant trends in the development of IHL including the absence of formal law-making by states, informal law-making through manual processes and the increasing role of sub and non-state actors. *Law-Making and Legitimacy in International Humanitarian Law* will be of benefit to scholars and students of international law and relations, as well as practitioners working in the field of IHL, particularly in government ministries, international organizations and NGOs.

Classification of Conflicts in International Humanitarian Law Feb 14 2021 Civil wars have formed the vast majority of all armed conflicts since the Second World War. These civil wars have often been accompanied by the intervention of foreign states in favour of one or more of the parties. Such interventions raise various general questions regarding conflict classification in international humanitarian law (IHL), which are important because the relevant law that applies is shaped by whether a conflict is classified as international or non-international. This book provides a thorough examination of the theoretical basis of classification of conflicts in IHL, with special focus on the legal impact of armed foreign intervention in civil wars. Noam Zamir enriches the discourse on IHL by providing an in-depth doctrinal examination of issues concerning conflict classification and examining recent civil wars with foreign interventions, such as the Libyan civil war (2011), Mali civil war (2012-2015) and the ongoing civil war in Yemen, and identifying potential solutions to different lacunae in this field. The issue of conflict classification has significant practical ramifications and this book will have a wide and varied readership, including legal scholars, law students and governmental and military lawyers.

International Humanitarian Law and Justice Aug 11 2020 This book brings together scholars from various fields, including law, history, sociology and international relations to examine this historization of international humanitarian law.

Proportionality in International Humanitarian Law Mar 30 2022 The principle of proportionality is one of the corner-stones of international humanitarian law. Almost all states involved in armed conflicts recognize that launching an attack which may cause incidental harm to civilians that exceeds the direct military advantage anticipated from the attack is prohibited. This prohibition is included in military manuals, taught in professional courses, and accepted as almost axiomatic. And yet, the exact meaning of the principle is vague. Almost every issue, from the most elementary question of how to compare civilian harm and military advantage, to the obligation to employ accurate but expensive weapons, is disputed. Controversy is especially rife regarding asymmetrical conflicts, in which many modern democracies are involved. How exactly should proportionality be implemented when the enemy is not an army, but a non-state-

actor embedded within a civilian population? What does it mean to use precautions in attack, when almost every attack is directed at objects that are used for both military and civilian purposes? In *Proportionality in International Humanitarian Law*, Amichai Cohen and David Zlotogorski discuss the philosophical and political background of the principle of proportionality. Offering a fresh and comprehensive look at this key doctrine, they comprehensively discuss the different components of the proportionality "equation" - the meaning of "incidental harm" to civilians; the "military advantage" and the term "excessive". The book proposes the debates over the principle of proportionality be reframed to focus on the precautions taken before the attack along with the course States should follow in investigations of the violations of the principle.

International Humanitarian Law and Non-State Actors Nov 13 2020 This book challenges the traditional approach to international law by concentrating on international hThis book challenges the traditional approach to international law by concentrating on international humanitarian law and placing the focus beyond States: it reflects on current legal, policy and practical issues that concern non-State actors in and around situations of armed conflict. With the emergence of the nation-State, international law was almost entirely focused on inter-State relations, thus excluding - for the most part - non-State entities. In the modern era, such a focus needs to be adjusted, in order to encompass the various types of functions and interactions that those entities perform throughout numerous international decision-making processes. The contributions that comprise this volume are oriented towards a broad readership audience in the academic and professional fields related to international humanitarian law, international criminal law, international human

rights law and general public international law. Ezequiel Heffes, LL.M., is a Thematic Legal Adviser in the Policy and Legal Unit at Geneva Call in Geneva, Switzerland, Marcos D. Kotlik, LL.M., is Academic Coordinator at the Observatory of International Humanitarian Law of the University of Buenos Aires, School of Law and was a Judicial Fellow at the International Court of Justice between 2018-2019, and Manuel J. Ventura, LL.M. International Humanitarian Law Oct 13 2020 First Published in 1998, this book presents an analysis of international humanitarian law, the law governing and seeking to mitigate the conduct of armed conflict. Since the first edition of this work came out in 1990 there have been important developments in the law and, sadly, a continuing experience of armed conflict and the humanitarian crises which it represents. As a result, this is not so much an 'updating' as the offering of a new book. International humanitarian law is here taken as coterminous with the jus in bello and covers both its 'Geneva' and 'Hague' elements dealing, respectively with the humanitarian protection and assistance of victims of armed conflict and the controls and restrictions placed upon methods and means of warfare. The rules and principles of international humanitarian law are presented and analysed in the context of their practical application in warfare, with emphasis upon recent experience. The Work is Primarily dedicated to the law relating to international armed conflict but also includes discussion of the relevant law applicable to non-international and 'low level' conflict.

Non-Binding Norms in International Humanitarian Law Aug 30 2019 This monograph examines and analyses the phenomenon of non-binding instruments (also known as 'soft law') in the law of armed conflict, or international humanitarian law. It covers the benefits and drawbacks for States and non-States actors as well as their effectiveness and development in the context of armed conflict.

Rudiments of International Humanitarian Law Jul 10 2020 The book 'Rudiments of Humanitarian Law', is an easy to read edition. The basics enumerated in the book can be easily assimilated and digested by students of International Humanitarian Law or even general readers of the theme providing them a common insight on the subject. Battles and Wars, are characterized by brutal and arbitrary violence. International Humanitarian Law plays an important role in harnessing civilized deliberations at the time of war and compels the conflicting states/nations, to follow a particular code of war upholding the rights of the disputing nations, the civilians, the soldiers, the prisoners of war, etc; thereby it controls the reigns of warring factions. The world has been a witness to number of wars and battles, confrontations and conflicts. Such power struggles lead to innumerable problems such as legal, political, socio-economic and humanitarian. Hence a need was felt that governments, organizations and individuals in the field, intervene to strategize a path for comity of nations. Individual initiatives of philanthropists like Henry Dunant who witnessed the pain and agony of 40,000 (forty thousand) soldiers after the battle of Solferino (1859) led to a normative frame work as well as an institutional response culminating in the establishment of the International Committee of Red Cross in

1863 and the adoption of Geneva Conventions in 1940 and additional protocols of 1977. International Humanitarian Law is burgeoning as an important system of justice and has gained momentum in the recent past with its activists across the globe.

***Yearbook of International Humanitarian Law Oct 01 2019* This volume commemorates the centenary of the First World War (1914-2014) and aims to capture 100 years of warfare evolution. Among the main issues addressed are the changing nature of means and methods of warfare, the law of weaponry, and challenges to humanitarian assistance and protection of the civilian population affected by armed conflict. Specific topics include the legal regime governing nuclear weapons, the prohibition of chemical weapons and arms control, the evolution of naval warfare, asymmetric conflicts, the law of occupation and cultural property. A comprehensive Year in Review also describes the most important events and legal developments that took place in 2014. The Yearbook of International Humanitarian Law is the world's only annual publication devoted to the study of the laws governing armed conflict. It provides a truly international forum for high-quality, peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by contemporary relevance, the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, civil servants, diplomats, human rights workers and students.**

***International Humanitarian Law: Theory, Practice, Context Jun 01 2022* This book is about international humanitarian law or - as it is also called - the "law of armed conflict" or "law of war". It emerged from a series of lectures delivered at the Hague Academy of International Law. The author deals with war and the means by which international law attempts to contain and, as it were, "humanize" organized violence. But the ambitions of the author go beyond the battlefield. The book explores the many complex ways in which law functions to regulate warfare, in theory and practice. The author looks into treaties and other sources of international law, but he also tries to step outside the boundaries of "black-letter law" to deal broadly with such matters as the influence of culture in shaping the norms on war, the institutions that develop those norms and work for their universal acceptance, the networks of humanitarian actors in this area and the legal procedures in which the law of war and its various institutions are embedded. The book demonstrates that even wars are, in various ways, conducted in "the shadow of the law".**
