Demystifying Dissertation Writing Jan 13 2021 Research shows that five strategies correlate with the successful completion of a dissertation: Establishing a consistent writing routine Working with a support group Consulting your advisor Understanding your committee's expectations Setting a realistic and timely schedule Building on these insights, this book is for anyone who needs help in preparing for, organizing, planning, scheduling, and writing the longest sustained writing project they have encountered, particularly if he or she is not receiving sufficient guidance about the process, but also for anyone looking to boost his or her writing productivity. The author uncovers much tacit knowledge, provides advice on working with dissertation advisors and committee members, presents proven techniques for the prewriting and writing stages of the dissertation, sets out a system for keeping on schedule, and advocates enlisting peer support. As Peg Boyle Single states, "my goal is quite simple and straightforward: for you to experience greater efficiency and enjoyment while writing. If you experience anxiety, blocking, impatience, perfectionism or procrastination when you write, then this system is for you. I want you to be able to complete your writing so that you can move on with the rest of your life." Few scholars, let alone graduate students, have been taught habits of writing fluency and productivity. The writing skills imparted by this book will not only help the reader through the dissertation writing process, but will serve her or him in whatever career she or he embarks on, given the paramount importance of written communication, especially in the academy. This book presents a system of straightforward and proven techniques that are used by productive writers, and applies them to the dissertation process. In particular, it promotes the concept of writing networks - whether writing partners or groups - to ensure that writing does not become an isolated and tortured process, while not hiding the need for persistence and sustained effort. This book is intended for graduate students and their advisers in the social sciences, the humanities, and professional fields. It can further serve as a textbook for either informal writing groups led by students or for formal writing seminars offered by departments or graduate colleges. The techniques described will help new faculty advise their students more effectively and even achieve greater fluency in their own writing.

Discourse, language: English, abstract: Academic writing is a task that students, especially in the social sciences, engage in very frequently during the course of their studies. They have to compose essays, research reports, term papers etc., which, besides being the basis for students' evaluation, are to prepare them for their professional careers later in life. For those who will stay in the field, writing is going to be a major activity. At university a student's writing skills set him or her apart from other students in the eyes of the professor, but there is no real competition; all papers will be read by the instructors. In the professional world, however, with an abundance of academic texts and with limited time, only those articles will get attention that, besides containing profound reasoning, are at the same time well written, i.e. conveniently structured, precise, short, well formulated etc. This paper is part of a study on academic writing conducted within the seminar "Academic Discourse". The study examines students' works with regard to the authors' writing skills. It looks at the various components of a student term paper (linguistic features and structural elements) to detect the problems German students of English have. The objective is to create a guide for current and future students in this department experiencing difficulties in this area. It combines advice from published writing guides and professors, linguistic theory and personal experience, and is to be an introduction to academic writing for beginners and a reference booklet for the more experienced. We did not attempt to produce a "How-to" manual but rather tried to name the problem areas and to offer help on those with advice and examples. It cannot take the responsibility off the students for the further refinement of their skills by othe

Politics and the English Language Aug 08 2020 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the *Orwell's Essays* series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can - and must - be rediscovered with every age.' — *Irish Times*

Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources.
